PROFESSIONAL OBJECTIVE

Final-year Software Engineering student at FST Mohammedia, specializing in **Full-Stack Web Development**, seeking a **final-year internship (PFE)** within a technology-driven R&D environment.

- **Areas of Interest:** Full-Stack development, microservices architecture, LLM/AI integration, software research and innovation.
- **Availability:** Starting January 2027.
- **Motivation:** Contribute to Oracle Morocco R&D Center's mission of building innovative, high-impact products through hands-on learning and collaboration with industry experts.

EDUCATION

Faculty of Sciences and Techniques, Mohammedia

Engineering Degree - Software Engineering and Systems Integration

2024 – Present

Mohammedia, Morocco

Faculty of Sciences Ain Chok

Bachelor's Degree in Mathematics and Computer Science - Databases

2021 – 2024

Casablanca, Morocco

PROFESSIONAL EXPERIENCE

SecureValley

Full-Stack Developer Intern

April 2026 – June 2026

Témara, Morocco

- Developed an **SOA platform** (Service-Oriented Architecture) (3 applications in **Next.js/TypeScript**) including an institutional showcase, an e-commerce store with **Stripe** payments, and a learner evaluation application, built on a **microservices** architecture secured with **JWT** (JSON Web Token) and data persistence via **Prisma ORM** (Object-Relational Mapping).

Safarelec

Web Developer Intern

April 2025 – June 2025

El Jadida, Morocco

- Designed an intervention management application using **React.js/Express.js**, streamlining import/export flow tracking for the operations team.

TECHNICAL SKILLS

- **Languages:** Java (Jakarta EE), C/C++, JavaScript, TypeScript, PHP, Assembly, Shell.
- **Backend & Web:** React JS, React Native, Next.js, NestJS, Express JS, Spring Boot, .NET, Tailwind CSS.
- **Databases & Data:** PostgreSQL, MySQL, SQL Server, Oracle PL/SQL, Redis, Prisma ORM, Power BI.
- **DevOps & Tools:** Git/GitHub, Docker, Figma, Jira.

PROJECTS

Pathfinding Visualizer Engine | C++, WebAssembly, React, Dijkstra, A*, BFS

January 2026

- Built a high-performance pathfinding engine in **C++** compiled to **WebAssembly** (WASM) for near-native in-browser execution, with implementation and benchmarking of **A***, **Dijkstra**, and **BFS** algorithms on 800-node grids.

Intelligent E-Commerce Platform | .NET, SqlServer, Redis, LLM, RAG

January 2026

- Built a robust **.NET 8** backend with a distributed shopping cart via **Redis**, integrating an intelligent client assistant powered by an **LLM** (Large Language Model) and the **RAG** (Retrieval-Augmented Generation) pattern for reliable, context-aware answers based on the product catalog.
